1. 2A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 30, 2005 has been entered.
2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
3. The drawings are objected to because all blocks in Fig. 7 should be labeled with descriptive legends known in the art. Correction is required.
4. Claims 3, 4, 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, lines 2-3, claim 4, line 3, it is confusing for reciting "a predefined threshold". Is it referring to the same predefined threshold as in claim 1, line 13?

In claim 7, line 2, "said first kind test of a first kind" should read as -- said first kind of test -- for proper claim language recitation.

In claim 8, line 3, "traffic" should be deleted for consistency in claim language.

5. Claims 1, 2, 5 and 6 allowed.
6. Claims 3, 4, 7-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2665

Olofsson et al. and Kauhanen et al. are additionally cited to show the feature of admission control utilizing bearer allocation for bearer request similar to the claimed invention.
